PROFESSIONAL SUMMARY

Certified MuleSoft Developer with 4+ years of experience engineering scalable API-Led connectivity solutions using Mule 4 and Anypoint Platform. Proven track record of optimizing complex DataWeave transformations, driving robust CI/CD pipelines, and delivering seamless integrations across enterprise systems like Salesforce and PostgreSQL. Adept at enforcing API governance, reducing manual processing overhead, and elevating system reliability for healthcare and insurance domains.

TECHNICAL SKILLS

- **MuleSoft:** Mule 4, AnyPoint Platform, API Manager, Runtime Manager
- **Integration:** API Led Connectivity, REST APIs, RAML, Event Driven Architecture
- **Data Transformations:** DataWeave
- **Tools:** Bitbucket, Bamboo, SonarQube, ELK, Azure DevOps
- **Programming**: Java (Basics)
- **Databases:** MySQL, PostgreSQL

EXPERIENCE

Senior Software Engineer, Capgemini Technology Services *Jan 2022 - Present*

- Designed and deployed 15+ MuleSoft APIs using API-led architecture, improving integration efficiency and reducing manual intervention.
- Developed RAML-driven APIs across System, Process, and Experience layers ensuring reusable and scalable architecture
- Optimized DataWeave transformations for high-volume payloads, improving processing efficiency.
- Implemented API governance policies enhancing security, scalability, and lifecycle management.
- Improved code quality through MUnit testing and increased test coverage.
- Integrated MuleSoft APIs with Salesforce and relational databases enabling seamless data synchronization.
- Built CI/CD pipelines using Bamboo reducing deployment time and improving release reliability.
- Managed CloudHub deployments including monitoring, logging, and production issue resolution.

KEY PROJECTS

1.ZM Policy Search Integration

- Delivered end-to-end MuleSoft solution reducing manual claim processing by 20%.
- Integrated 10+ stored procedures improving backend performance.
- Enhanced search functionality improving response time.

2.London Market Integration

- Built centralized MuleSoft integration layer connecting 5+ systems.
- Enabled real-time processing improving system latency.
- Collaborated with cross-functional teams for scalable delivery.

ACHIEVEMENTS

- Employee of the Month for impactful contributions.
- Promoted to Senior Software Engineer within one year.
- Reduced production issues via improved monitoring and logging.
- Mentored developers on MuleSoft and DataWeave best practices.

CERTIFICATIONS

- **Certified MuleSoft Developer - Level -1 (Mule 4)**

- **Certified MuleSoft Integration Associate**

EDUCATION

Bachelor of Engineering (Electronics and Communications) *August 2017 -May 2021*
Hirasugar Institute of Technology **CGPA 7.4/10**
